PERSONAL SUMMARY

Performance-focused Full Stack Engineer with 3+ years of experience building scalable web applications using Next.js, React.js, Node.js, and cloud technologies. Specialized in SEO optimization, SSR/SSG architecture, AI-powered workflows, and AWS/GCP deployments. Experienced in developing eCommerce, fintech, and ERP/CRM-driven platforms with expertise in customer management, inventory, order workflows, and scalable system design.

EXPERIENCE

Libas Collective Trading LLC [\[Live Site\]](#)

Jul 2025 – Jul 2026

Software Development Engineer - (Dubai, UAE)

- Led the migration of a large-scale luxury eCommerce platform from **React.js to Next.js**, improving scalability, frontend performance, and SEO visibility across high-traffic product pages.
- Implemented **Server-Side Rendering (SSR)** and optimized routing architecture, contributing to over **727K search impressions, 11.9K organic clicks**, and an average Google search position of **5.7**.
- Improved **Core Web Vitals** and technical SEO through **SSR, lazy loading, image optimization, structured data, sitemap generation, canonical URLs, caching strategies, and code splitting**, achieving **100 SEO score, 0.4s FCP, 1.2s LCP**, and improved Lighthouse/PageSpeed performance.
- Performed advanced technical SEO audits using **Ahrefs**, optimizing crawlability, indexing, internal linking structure, keyword visibility, and overall search performance for luxury marketplace pages.
- Optimized **Algolia indexing workflows** and minimized excessive **Firestore read operations** through caching, query optimization, and efficient data-fetching strategies, reducing infrastructure costs and improving application scalability.
- Managed cloud deployment, monitoring, and production optimization workflows using **Google Cloud Platform (GCP)**, Firebase services, and modern CI/CD practices.
- Developed scalable eCommerce features and secure API integrations supporting dynamic product management, authenticated user workflows, and marketplace operations.
- Integrated **AI-assisted operational workflows and automation systems** to streamline operational processes, content handling, and customer experience optimization.

Delta International

June 2023 – June 2025

Software Development Engineer - (Dubai, UAE)

- Contributed as a core software developer to a project recognized by the **Guinness World Records**.
- Led frontend and backend development for the **Dubai Trading Expo**, delivering scalable trading solutions for over **5,000+ active users**.
- Delivered enterprise-grade platforms for **UAE-based clients**, improving system uptime, scalability, and application performance by **30%**.
- Built and deployed scalable fintech and trading platforms using **Next.js, MERN stack, Prisma ORM, CI/CD pipelines, and AWS infrastructure** with zero-downtime deployments.

- Developed and maintained **7+ fintech and trading platforms**, contributing to a **40% increase in client onboarding and operational growth.**

Sep 2022 – June 2023

Miztech AI Minds

Product Engineer & Tech. Specialist - (Ernakulam,India)

- Contributed to the development of core functionalities for **OpzHive**, a SaaS-based product platform.
- Developed **SEO-friendly** web applications and internal HRM systems using modern frontend and backend technologies.
- Worked in **Agile/Scrum** environments with collaborative sprint planning, iterative development, and cross-functional team coordination.

NOTABLE PROJECTS

- **CarltonEdu – Forex Education Platform:** Developed scalable LMS features including dashboards, course tracking, and payment integrations using **Next.js**. [\[Live Link\]](#)
- **JournalBook – Trading Analytics Platform:** Built a trading journal and analytics system with charting, filters, and performance tracking using **Next.js** and **PostgreSQL**. [\[GitHub\]](#)
- **Truzon.ai – AI Trading Platform:** Developed AI-powered trading dashboards with automation workflows and real-time communication using **Next.js** and **Socket.io**. [\[GitHub\]](#)

ACHIEVEMENTS

- Contributed as a **Software Developer** for a project recognized by **GUINNESS WORLD RECORDS**, in collaboration with Delta International and Miles Capitals.
- Actively involved in guiding peers and juniors through **mentorship and tech community engagement**.

TECHNICAL SKILLS

Frontend: Next.js, React.js, Angular, TypeScript, JavaScript, WordPress, Redux, Context API, Tailwind CSS, Material UI, Framer Motion, Chart.js, HTML5, CSS, SCSS

Backend: Node.js, Express.js, PHP, Python, MongoDB, PostgreSQL, MySQL, GraphQL, Prisma ORM, TypeORM, REST APIs, JWT Authentication, OAuth, Microservices

Cloud & DevOps: AWS (EC2, S3, Route 53), Google Cloud Platform (GCP), Cloudflare, CI/CD Pipelines, NGINX, Vercel, SSL Deployment, Firebase, Firestore, Pub/Sub

Performance & SEO: Technical SEO, Core Web Vitals, SSR/SSG, Lighthouse Optimization, Structured Data, Sitemap Optimization, GTM, Performance Optimization

AI & Integrations: AI Workflow Integration, OpenAI API, Socket.IO, Stripe, Razorpay, Supabase, Cloudinary, Nodemailer, AWS S3

Tools: Git, GitHub, Docker, Postman, Agile/Scrum, Figma, Linux

EDUCATION

B.Tech - Electrical and Electronics Engineering - 8.5 GPA

2018 – 2022

School of Engineering, CUSAT
